

Student Council Motion

SC-8.1 Wednesday lectures

What issue is your proposal going to address?

Classes to not be scheduled for Wednesdays. Wednesdays are meant to be for AU sport event and though this is not the case for most engineering students as there is always a lecture on Wednesday. This is the case for a lot of students I have talked to and me as well. We are having to miss the lecture to play for the university team and this really is not fair to the students.

Why this is important to University of Hertfordshire Students?

The students pay a lot of money to be in university and wanting to play for the team but missing lectures every week isn't fair on them. This is not the case just for engineering students but so many other students with different courses of study as well.

What action would you like the Students' Union to take?

I think the union should represent all students by taking this to the relating department and move any lectures on Wednesday to another day during the week.
